DOJ of Texas
to sue Sulpicio exec

By Dana J. Delabre

THE TEXAS ATTORNEY GENERAL'S OFFICE has filed a lawsuit against the Philippine government for allegedly covering up the death of a young man who was killed in a shipwreck off the coast of Texas.

PHILIPPINE DEPOSIT INSURANCE CORPORATION

8th Depositor Protection and Awareness Week

June 14-22, 2010

PDIC's claims settlement operations now ISO-certified

The Philippine Deposit Insurance Corporation (PDIC) is pleased to announce that its claims settlement operations have been certified by the International Organization for Standardization (ISO) to ISO 9001:2008.

This certification is a testament to the high standards of PDIC's claims settlement operations, which are designed to ensure that claimants receive prompt and accurate settlements. The certification also demonstrates PDIC's commitment to continuous improvement and quality management.

The PDIC's claims settlement operations are designed to ensure that claimants receive prompt and accurate settlements. The certification also demonstrates PDIC's commitment to continuous improvement and quality management.

Depositor protection through the Be A Wise Saver Campaign

The PDIC is launching a new campaign to educate the public on the importance of deposit insurance. The campaign, titled "Be A Wise Saver," aims to help savers understand how to protect their deposits and make informed financial decisions.

The campaign will feature a series of educational materials, including brochures, posters, and videos. These materials will be distributed through various channels, including banks, government offices, and community centers.

The PDIC is also launching a series of seminars and workshops to educate the public on the importance of deposit insurance. These seminars will be held in various locations across the country.

Thomas talks 'trafficking' with Binay

By Pinar Florio
 President Benigno Aquino III and Vice President Noli de la Rosa met with a delegation of lawmakers from the United States House of Representatives on Tuesday to discuss the issue of human trafficking.
 The delegation, led by Rep. Henry Hyde (R-Ill.), is the largest group of lawmakers to visit the Philippines since the end of the Marcos era.
 Hyde, who is also the chairman of the U.S. House Committee on the Judiciary, said the group is interested in learning more about the Philippines' efforts to combat human trafficking.
 "We are very interested in the Philippines' efforts to combat human trafficking," Hyde said. "We are also interested in learning more about the Philippines' legal system and its efforts to protect the rights of its citizens."

The delegation will be in the Philippines for a week, from June 22 to June 28. They will meet with President Aquino, Vice President de la Rosa, and other government officials. They will also visit various government agencies and organizations that are working to combat human trafficking.
 The delegation is part of a larger effort by the U.S. House of Representatives to increase its understanding of human trafficking around the world. In recent years, the House has passed several bills to strengthen the U.S. Department of State's efforts to combat human trafficking.
 "We are very interested in the Philippines' efforts to combat human trafficking," Hyde said. "We are also interested in learning more about the Philippines' legal system and its efforts to protect the rights of its citizens."

Passport an income, says DEX

For some people, a passport is not just a document that allows them to travel abroad. It is also a source of income. This is the case for a group of people known as "passport brokers." These individuals help people obtain passports for a fee, and they often charge a significant amount of money.
 According to a report by the Department of Expenditure and Finance (DEX), passport brokers are a common sight in the Philippines. They often operate in the informal sector, and they can be found in various parts of the country.
 "We are very interested in the Philippines' efforts to combat human trafficking," Hyde said. "We are also interested in learning more about the Philippines' legal system and its efforts to protect the rights of its citizens."

The following table shows the results of the regression analysis for the dependent variable *Y* (in thousands of dollars) against the independent variable *X* (in thousands of dollars). The table includes the regression equation, the coefficient of determination (R^2), the standard error of the estimate (s_e), and the standard error of the regression (s_b).

Variable	Regression Coefficient	Standard Error of the Estimate (s_e)	Standard Error of the Regression (s_b)
Intercept	10.0	1.0	1.0
X	0.5	0.5	0.5

The regression equation is $\hat{Y} = 10.0 + 0.5X$. The coefficient of determination is $R^2 = 0.8$, indicating that 80% of the variation in *Y* is explained by the variation in *X*. The standard error of the estimate is $s_e = 1.0$, and the standard error of the regression is $s_b = 0.5$.

Horley continues to boom

Abstract The purpose of this study was to determine the effect of a 6-week training program on the physical fitness and health-related quality of life (HRQL) of sedentary middle-aged women. A total of 70 women were randomly assigned to either a control group or an exercise group. The exercise group performed a supervised aerobic and resistance training program three times per week for six weeks. The control group did not participate in any structured exercise program. Pre- and post-training measurements included body composition, cardiovascular fitness, muscular strength, and HRQL. Results showed that the exercise group significantly improved their physical fitness and HRQL compared to the control group. These findings suggest that a 6-week supervised exercise program can effectively improve the physical fitness and HRQL of sedentary middle-aged women.

The figure consists of two separate line graphs, labeled (a) and (b), both plotting 'Rate of reaction' on the y-axis against 'Temperature' on the x-axis.

Graph (a) shows a bell-shaped curve. The rate of reaction starts at a low value at 10°C, rises to a peak at 30°C, and then decreases as the temperature increases further to 40°C.

Graph (b) shows a curve that starts at a low value at 10°C, rises very steeply between 20°C and 30°C, and then levels off, showing a much slower increase in the rate of reaction as the temperature continues to rise to 40°C.

Proposed kill quotas for whales called too high

Whale conservationists have expressed concern over a proposed quota for the killing of whales. The quota, which is part of a larger whaling program, is seen as being too high and could lead to the depletion of whale populations. Conservationists argue that the quota does not take into account the slow reproduction rate of whales and the potential for illegal whaling. They call for a more sustainable approach to whaling that prioritizes the protection of these endangered species.

China cardinal refers priest abuse case to the Vatican

A Chinese cardinal has referred a case of priest abuse to the Vatican. The case involves a priest who is accused of sexually abusing a minor. The cardinal, who is the head of the Chinese Catholic Church, has expressed his disappointment and has asked the Vatican to take appropriate action. The Vatican has a long history of dealing with priest abuse cases and has established a protocol for handling such allegations. The cardinal's referral indicates that the case is being taken seriously and that the Vatican will be involved in the investigation and resolution process.

New Agers, neo-pagans see Stonehenge solstice

A group of New Agers and neo-pagans gathered at Stonehenge to celebrate the summer solstice. The group, which included people of various ages and backgrounds, spent the day performing rituals and ceremonies. They believed that the solstice was a powerful time for spiritual growth and connection with nature. The gathering was peaceful and drew the attention of onlookers and the media. The event highlighted the enduring interest in pagan and New Age practices, even in a modern, secular society.

Pollution forces runoff in pull forced by air crisis

Pollution has forced a runoff in a pull forced by air crisis. The situation is described as a complex one, involving environmental factors and human intervention. The runoff is seen as a necessary measure to address the air crisis, which has reached a critical point. The text suggests that the runoff is a temporary solution and that long-term measures are needed to prevent such crises from recurring. The situation is a reminder of the urgent need for environmental protection and sustainable development.

Nations rethink drilling in wake of record oil spill in US

The oil spill in the US has led to a reevaluation of drilling practices. Nations are now rethinking their approach to offshore drilling in the wake of this record-breaking disaster. The spill has raised serious concerns about the safety and environmental impact of deep-sea drilling. Many countries are now implementing stricter regulations and safety protocols to prevent such disasters from happening again. The incident has also led to a renewed focus on alternative energy sources as a way to reduce dependence on fossil fuels.

SLEx builder seen facing more roadblocks

By Steven L. Lamm

Malaysian firm takes pride in completing project

THE SLEx builder, a Malaysian firm, is facing more roadblocks in its bid to build a new airport terminal in Kuala Lumpur, Malaysia. The firm, which has been working on the project for several years, is now facing a new set of challenges. The project is a major infrastructure project and is expected to cost several hundred million dollars. The firm is currently in the process of negotiating with the Malaysian government and other stakeholders. The project is expected to be completed by the end of the year.

No skin-deep music for these girls

By Rosinda Consuegra
Photos by David Perez

For these Alabang sisters, the music is not just a hobby. It's a way of life. The four members of the band, known as the "Sisters of the Sound," are dedicated to creating music that speaks to the heart. They are currently working on their latest album, which they hope to release soon.

The band's sound is a mix of pop and rock, with a strong emphasis on melody. They have performed at several local venues and have a growing fan base. Their music is a reflection of their passion and talent.

The band's success is a testament to their hard work and dedication. They continue to write and record new music, and they are excited to share it with their fans. Their journey in the music industry has been a rewarding one, and they are looking forward to the future.
